Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,372,195.

Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 5,639,443.

Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,258,339.

Although the conflicting claims are not identical, they are not patentably distinct from each other because both the claims of the three listed patents and the pending claim are drawn to microbubble compositions which include the same components in the generic claim, or in other words, species' encompassed by the patented claims fall entirely within the scope of claim 1. In other words, claim 1 is anticipated by the claims of the patents. For example, claim 1 of US Pat. 6,372,195, is drawn to a contrast agent composition which is within the genus of claim 1, as it contains microbubbles of gas A and B (wherein the gases have the same properties) and a ratio of gas which encompasses the instant ratio. The same is true for the claims of Pat. 5,639,443, which defines the gases and the ratio using different terminology, but which includes the same gas mixtures and ratios encompassed by the genus of claim 1. The claims of Pat. 6,258,339, are drawn to various species' of gas mixtures, and these gas mixtures are within the genus of claim 1 as defined by the specification for gases A and B, and the ratio is within the scope of the gas mixture as claimed. It is noted that the claims of '443 and '339 recite amounts of 1:100

to 1,000:1, which is within 1:200 to 1:1 ratio (recited by .5 to 50% gas B, with gas A as the balance) set forth in the instant claim.

Conclusion

No claim is allowed at this time. The claims are free of the art of record.
